All legal advertisements will be charged for at the rate of \$2.00 per square for the first jusertion. There will be no exception to this rate. No affidavit of publication will be made until the advertisement is paid for

No advertising cut, one inch square or smaller, will be accepted unless made of metal. No wood base cuts of this size will be used. Wood cuts are dangerous to forms and press.

Entered at the Postoffice in Tonopah as second-class matter

Judge Coleman's Plan

District Judge Ben F. Coleman of Ely has a plan he will submit to the legislature, wherein litigants will be saved both time and money, should his bill be enacted into law. The plan is an excellent one and is worthy of the consideration of the solons. It is best explained by Judge Coleman in his own words:

"It is asserted that the legal profession is the least progressive of all the professions and that the law is the most antiquated of all the There is much truth in this assertion. The public generally is disgusted with the technicalities of the law which result in unreasonable delays and in new trials and reversals where no substantial rights have been denied. We see litigants spending a great deal of time and money fighting over technicalities, and counties put to exorbitant expense in criminal cases because of the fact that new trials and reversals are granted because of some technical error committed but where no real injustice has been done. The legislature of this state long ago declared, "The court shall, in every stage of action, disregard any error or defect in the pleadings or proceedings, which shall not affect the substantial rights of the parties; and no judgment shall be reve sed or affected by reason of such error. A similar provision is contained in the Crim inal Practice act. Not sithstanding this broad declaratios, the courts have been reluctant a adopt as liberal a rule as I would like to see in practice. They are excusable for their conservatism in this connection, because it is exceedingly hard for lawyers and judges to concede that the technicalities of the law are not the embodiment of the wixdom and experience of centuries; besides, it may be said that our present interpretation is the product of the spirit of a quarter of a century ago. But this is a progressive age. A rule of law is no longer sacred because of its antiquity. We need a new declaration of policy by the legislature. This is an age of unrest. The public is demanding reforms in pleading and practice in both civil and criminal cases of such a character as will obviate new trials and reversals for mere technical errors, mistakes and omissions which do not affect the real merits of a case. The legal profession must procure the passage of reform laws or the people will revolutionize the laws and the courts. Revolutionary measures are seldom sane measures. The next legislature must pass a broad, comprehensive law to meet the needs of the times. All of the members-elect from White Pine county are pledged to such a law,"

The State University

An appropriation of about \$190,000 will be asked for by the Nevada state university when the legislature is making up allotments for the various state institutions. This sum is slightly in excess of the amount allowed two years ago, and the explanation is given that a number of improvements are to be added. With the university being managed by proper officials the appropriation could be considered as just and none too large, but with the present president at the head of the institution, it appears doubtful if the legislators will consider the request

The budget to be presented from the university contains two items of extreme importance. These being the pure food and drug commission and the weights and measures commission. Both bodies have accomplished excellent work since their lnauguration and from the manner in which state editors have favorably commended upon the results obtained, a united request will undoubtedly be made for the appropriations requested for these bodies.

The president of the state university received a severe snubbing from the last two legislative bodies. Four years ago charges were made that state funds were not being properly handled at the institution and a legislative committee was appointed to conduct an investigation. Two years ago the question arose as to appropriations for the construction of two new buildings, a mechanical engineering building and a biological building. The president personally pleaded for a biological building and the lawmakers granted the mechanical building.

Another snubbing appears due this session, notwithstanding the efforts of the board of regents to smooth matters and permit the college president to dictate just what shall be done by those who properly should give orders, instead of receiving them.

made toward safeguarding the lives of miners.

ELBOW ROOM IN NEVADA

Nevada, like some of her citizens, is seriously considering the high cost of living. A non-partisan movement has been started to devise means of BOOK CONTAINS COMPLETE RE- decreasing the expense of the state government. The system of dual government that obtains in the United States is admittedly expensive. The burden falls especially severe upon the people in those states that have large area and relatively little population. Elbow room costs, even is quite lengthy, embracing 80 pages. however, that converts a desert into A number of excellent photographs gardens, can be trusted "to find a

DISTRIBUTING TROUT FRY

The distribution of between 400, 000 and 500,000 eastern brook trout of the Giroux mine fire at Ely. The fry is to begin in about a week, acreport is one of the best issued by cording to James D. Clark of the state fish and game commission. a review of the work accomplished These fry are in the state hatchery in a mining sense in this state for near Verdi and were hatched from the past year. Mention is also eggs taken from trout domiciled in Marlette lake, a natural body of water northwest of Carson in which the supply of brook trout is replenished each year from the state hatchery. The fry are in the neighborhood of an inch in length and are to be used in replenishing with trout the smaller streams in the state. Only a small percentage will be used in
